

⚡ AI-Powered Governance Platform

CIVIC PULSE

Citizen Ingestion Meets Real-Time PMO Governance

☁ Google Cloud Run

🗄 BigQuery Federated Connections

🧠 Gemini AI

Designed for direct value demonstration to Non-Technical Elected Representatives in under 5 minutes.

Core Objectives

1. Understand Citizen Needs

Capture and analyze citizen feedback from multiple channels in real time to truly understand what matters most.

2. Prioritize with Data & AI

Use AI and public data to identify top issues, map hotspots, and recommend high-impact development priorities.

3. Enable Informed Decisions

Provide clear insights, comparisons, and impact estimates so MPs can take confident, evidence-based actions.

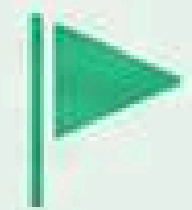

4. Ensure Transparency

Track every submission and action with complete visibility to build trust and accountability.

5. Drive Citizen Impact

Convert citizen voices into measurable outcomes through timely action and continuous feedback.

Our Mission: Empower MPs with real-time insights, AI intelligence, and transparent tracking — to turn every citizen voice into meaningful, data-driven action.

The Public Governance Gap

✖ The Problem Today

Why traditional complaint departments are slow & confusing:

- ⚠ **Fragmented Ingestion Channels**
Citizen alerts are split across WhatsApp, emails, local call portals, and papers.
- ⚠ **High Latency & Data Lag**
Standard dashboards refresh only once every 12-24 hours. Emergency signals remain hidden.
- ⚠ **No Accountability Metrics**
Lack of real-time performance tracking for local Lok Sabha, Vidhan Sabha, and Ward Officers.

"I filed it. Who has it?"

Without absolute end-to-end routing, citizens feel left in the dark, and representatives lose trust before the next election cycle.

The Civic Pulse Solution

1. Unified Ingestion

One unified door for citizens. Accepts direct high-speed voice messages, local language texts, and photos seamlessly.

2. Smart AI-Triage

No human routing errors. Gemini instantly tags category, reads geographic coordinates, and flags high-priority disasters.

3. Live PMO Dashboard

A transparent command desk rating response speed, local backlog issues, and official operational scores in real-time.

The 5-Minute MP Value: You don't have to search through folders. Your dashboard automatically rates and organizes your constituency's most urgent needs on one simple screen.

Gemini AI: The Digital Secretary

AI Pipeline Integration

Powered by highly scalable **Gemini 1.5 Flash**, acting as a tireless automated system translating raw citizen alerts into instantly actionable tasks.

Dialect Voice Transcription

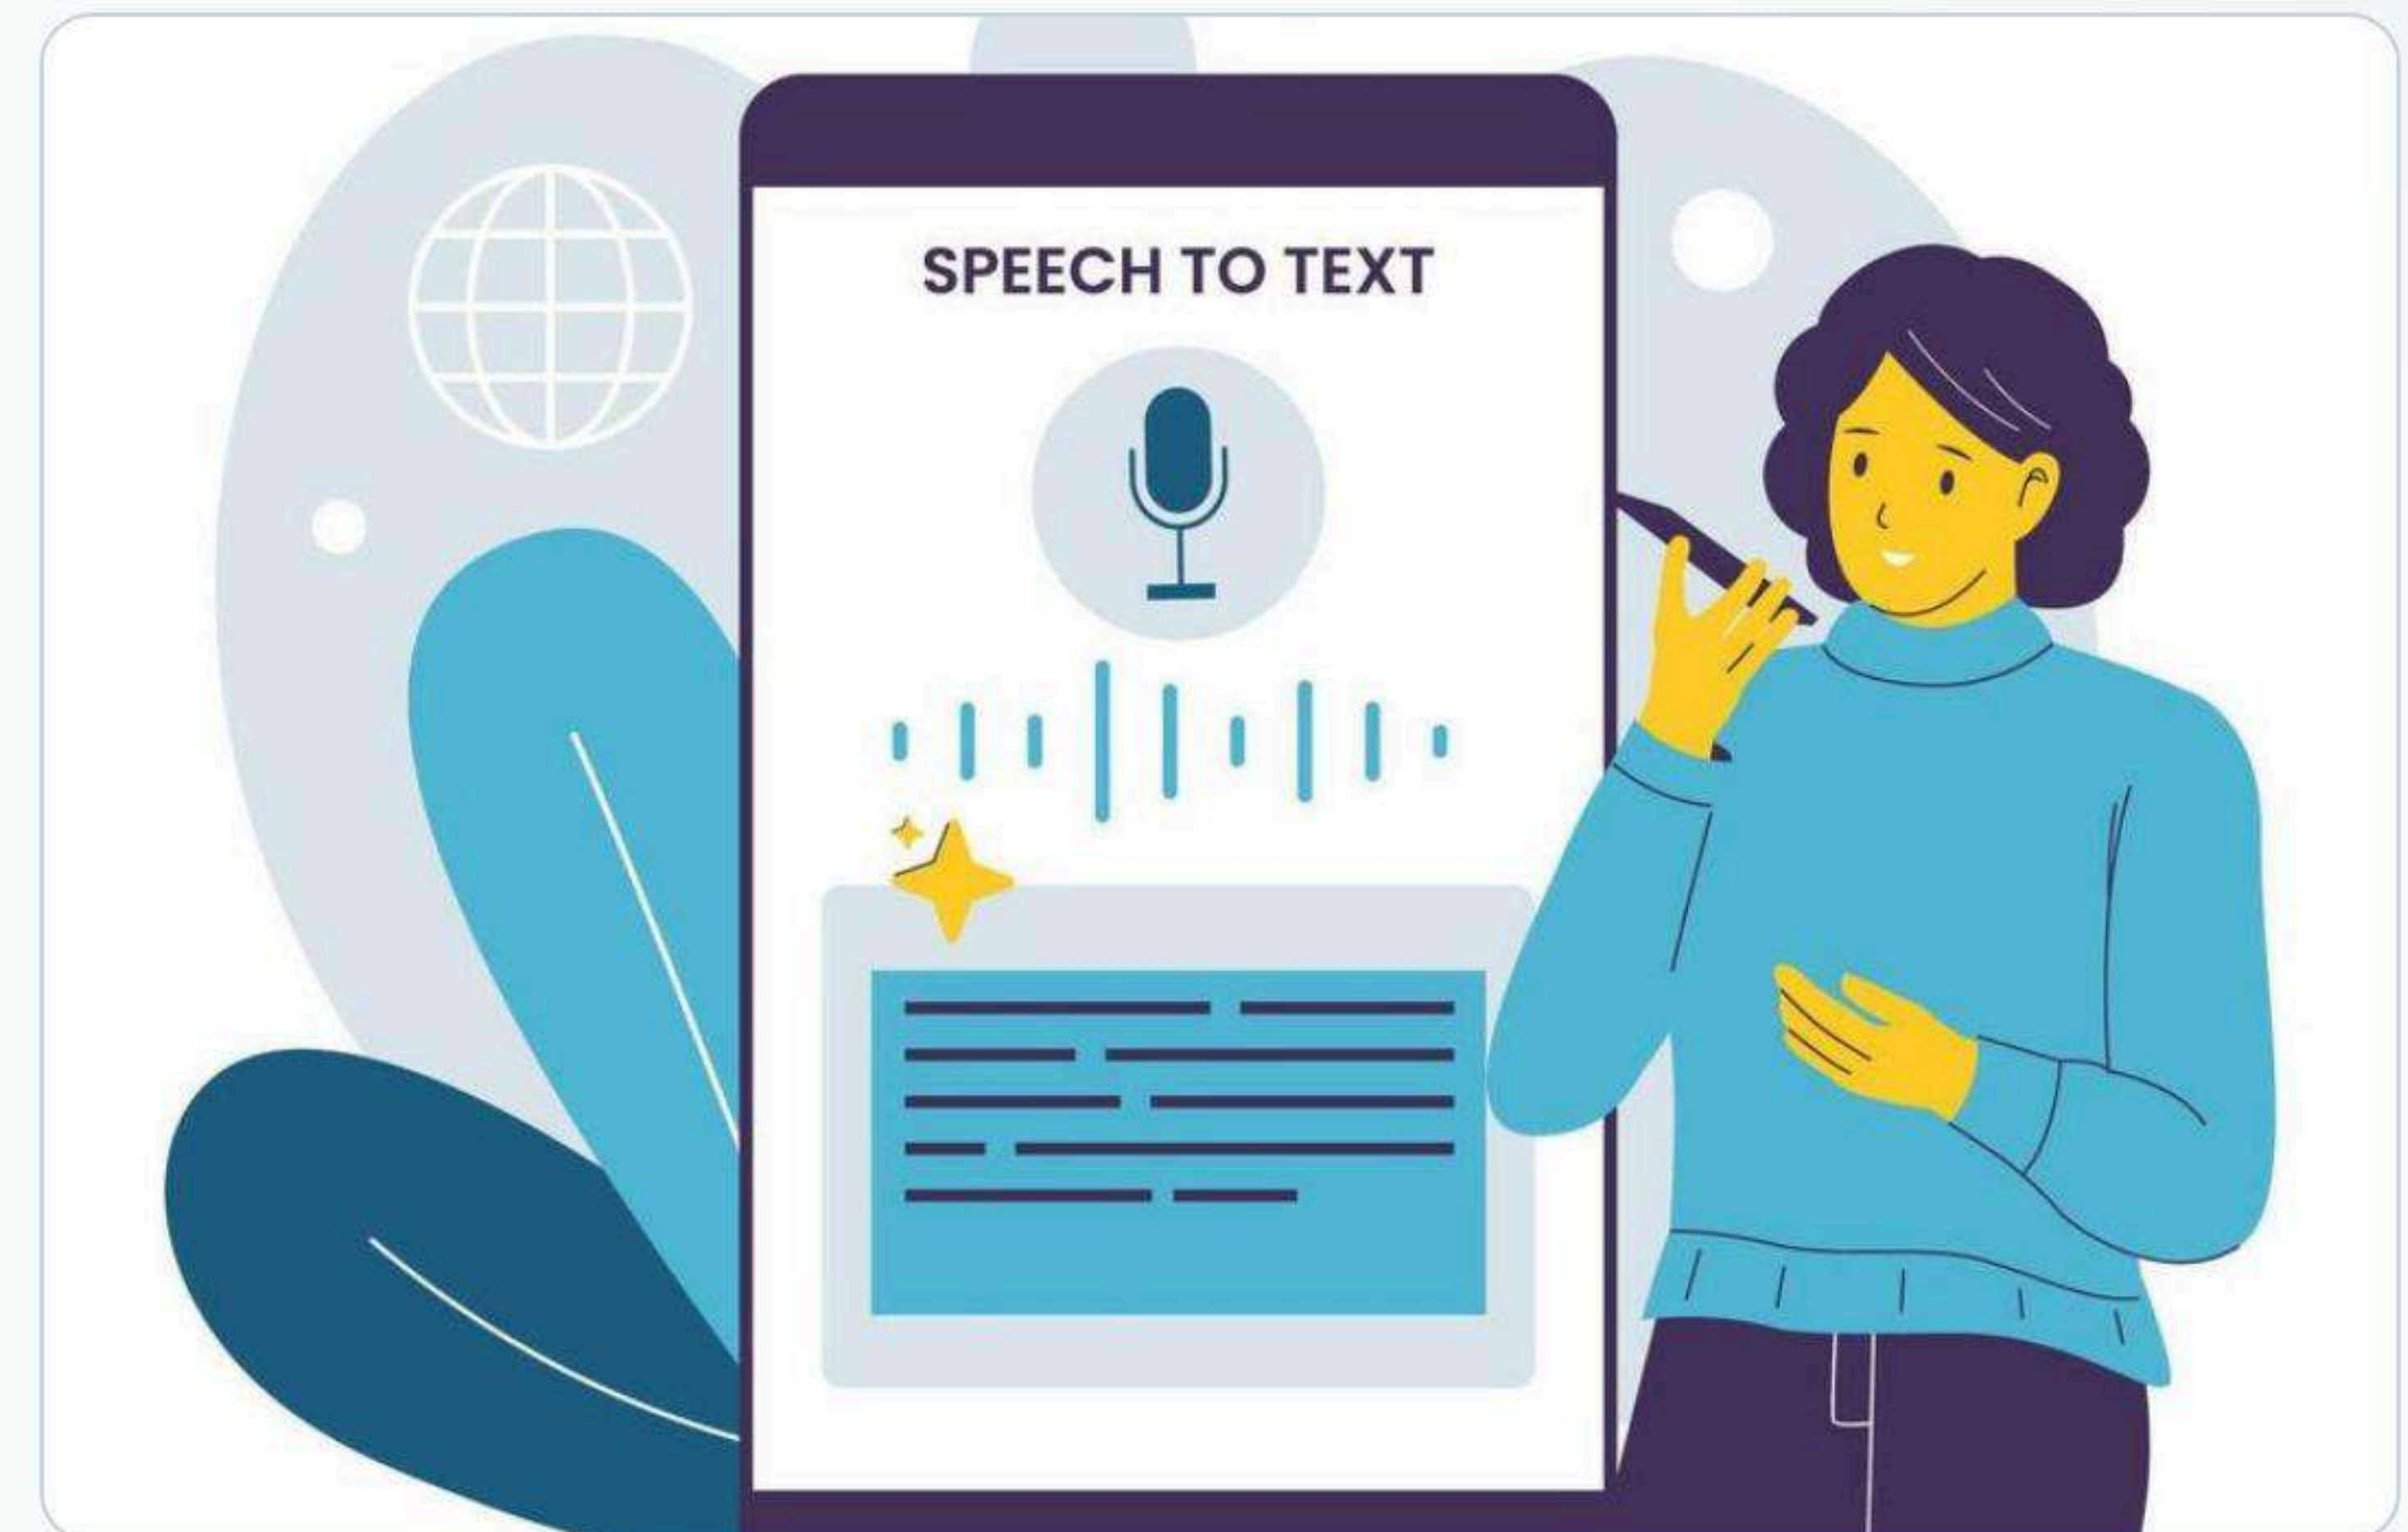

Transcribes and translates diverse regional languages & dialects instantly.

Auto-Routing by Department

Sends water alerts to sanitation, potholes to roads, and streetlights to electricity.

Urgency Risk Analysis

Generates risk weights instantly to ensure emergency incidents get fast attention.

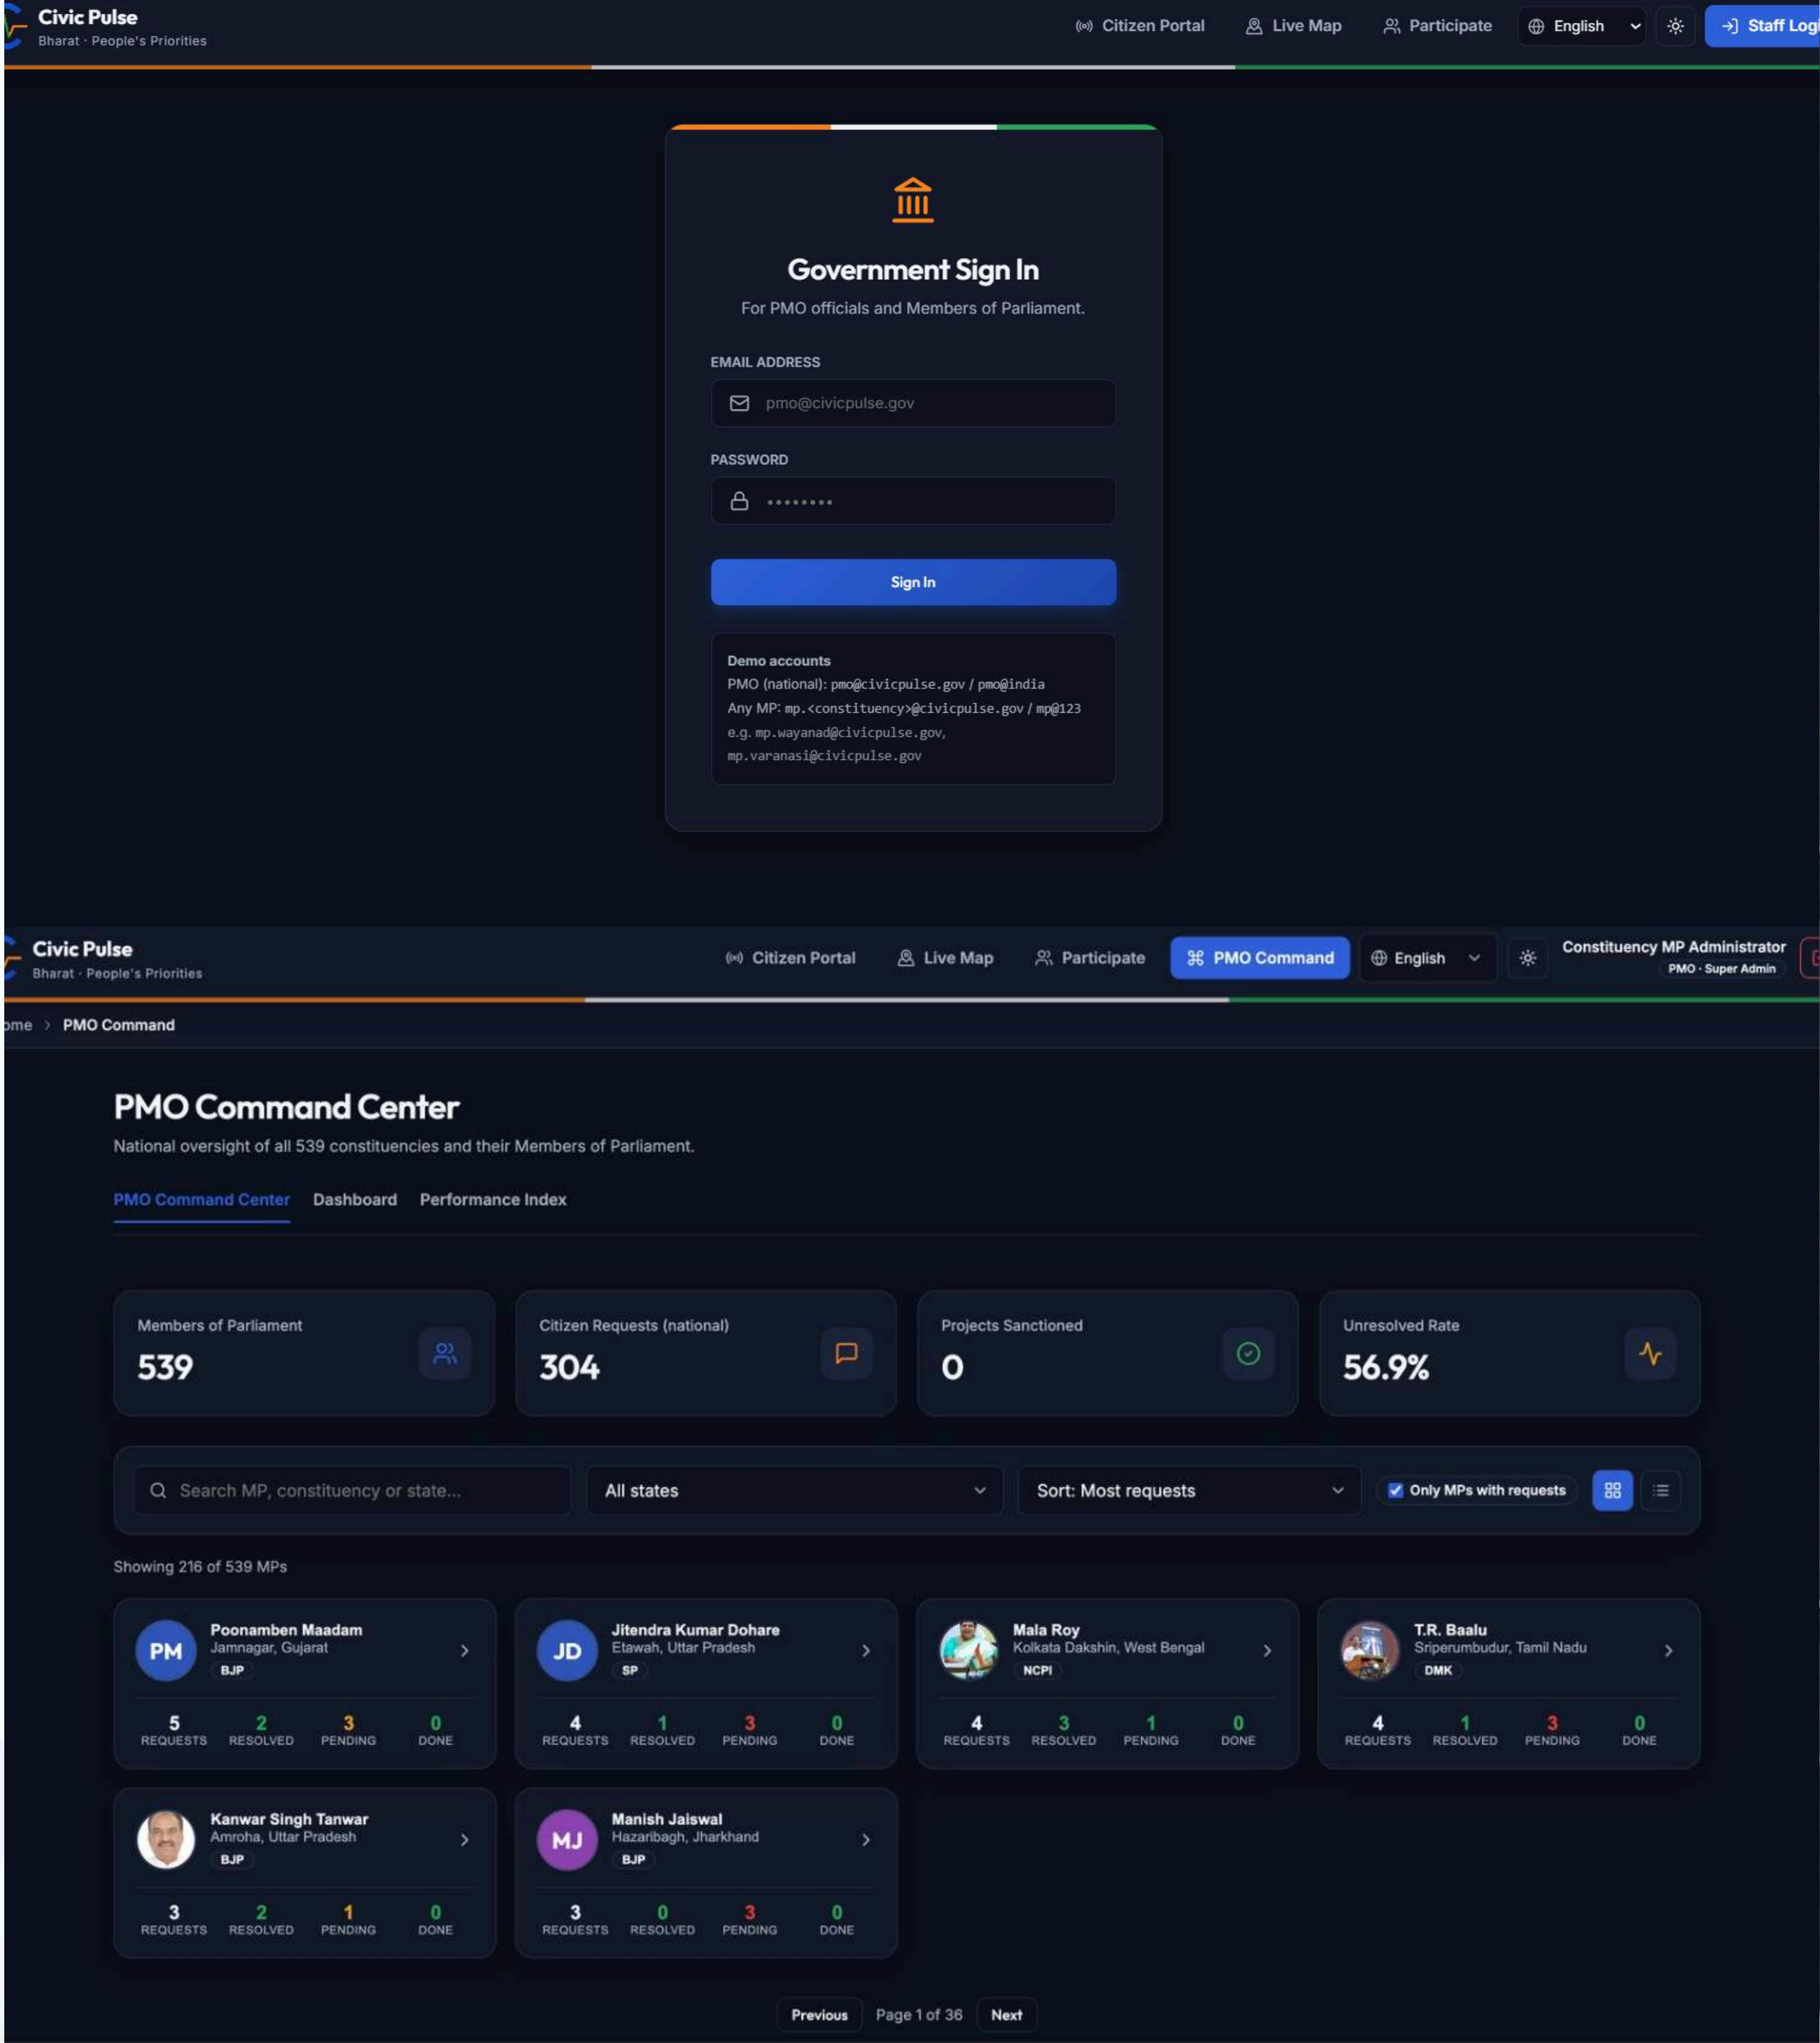

Simulated Mobile Voice Ingestion Triage Engine

Interactive Demonstration

Live Command Center

Designed for immediate daily monitoring by officials. View pending work progress, open backlogs, and representative Turnaround Time (TAT) metrics in one unified space.

Integrates clean dark-modes and adaptive responsive designs.

Accessible Light & Dark Modes

Designed to adapt effortlessly to any office desk or variable field-operating light conditions. Switch instantly with a single toggle button in the navigation header bar to secure maximum readability.

Dark Theme (High-Contrast Command Screen)

The screenshot shows the Civic Pulse app interface in dark mode. The header bar is dark with the Civic Pulse logo and navigation links. The main content area is dark, and the form elements are highlighted with light borders and text. The form includes a location selection step with dropdowns for state and constituency, a voice recording step with a microphone icon and a 'Tap to record' button, and a text input field for writing a request. There are also optional fields for phone number and photo, and a 'Submit to my MP' button at the bottom.

Operational Mode

Optimized for lower ambient glare in dynamic night command centers and multi-hour screening sessions.

Light Theme (High-Accessibility Screen)

The screenshot shows the Civic Pulse app interface in light mode. The header bar is light with the Civic Pulse logo and navigation links. The main content area is light, and the form elements are highlighted with dark borders and text. The form includes a location selection step with dropdowns for state and constituency, a voice recording step with a microphone icon and a 'Tap to record' button, and a text input field for writing a request. There are also optional fields for phone number and photo, and a 'Submit to my MP' button at the bottom.

Field Day Mode

Ensures high contrast under bright daylight conditions for outdoors operations and standard public ward offices.

System Architecture Made Simple

Technical Foundations

How the pipeline functions reliably under pressure:

FastAPI Cloud Node Pool

Rapid API handlers managed dynamically inside resilient Google Cloud Run.

PostgreSQL ACID Write Cache

Secure database safeguarding citizen files and suggestions concurrently.

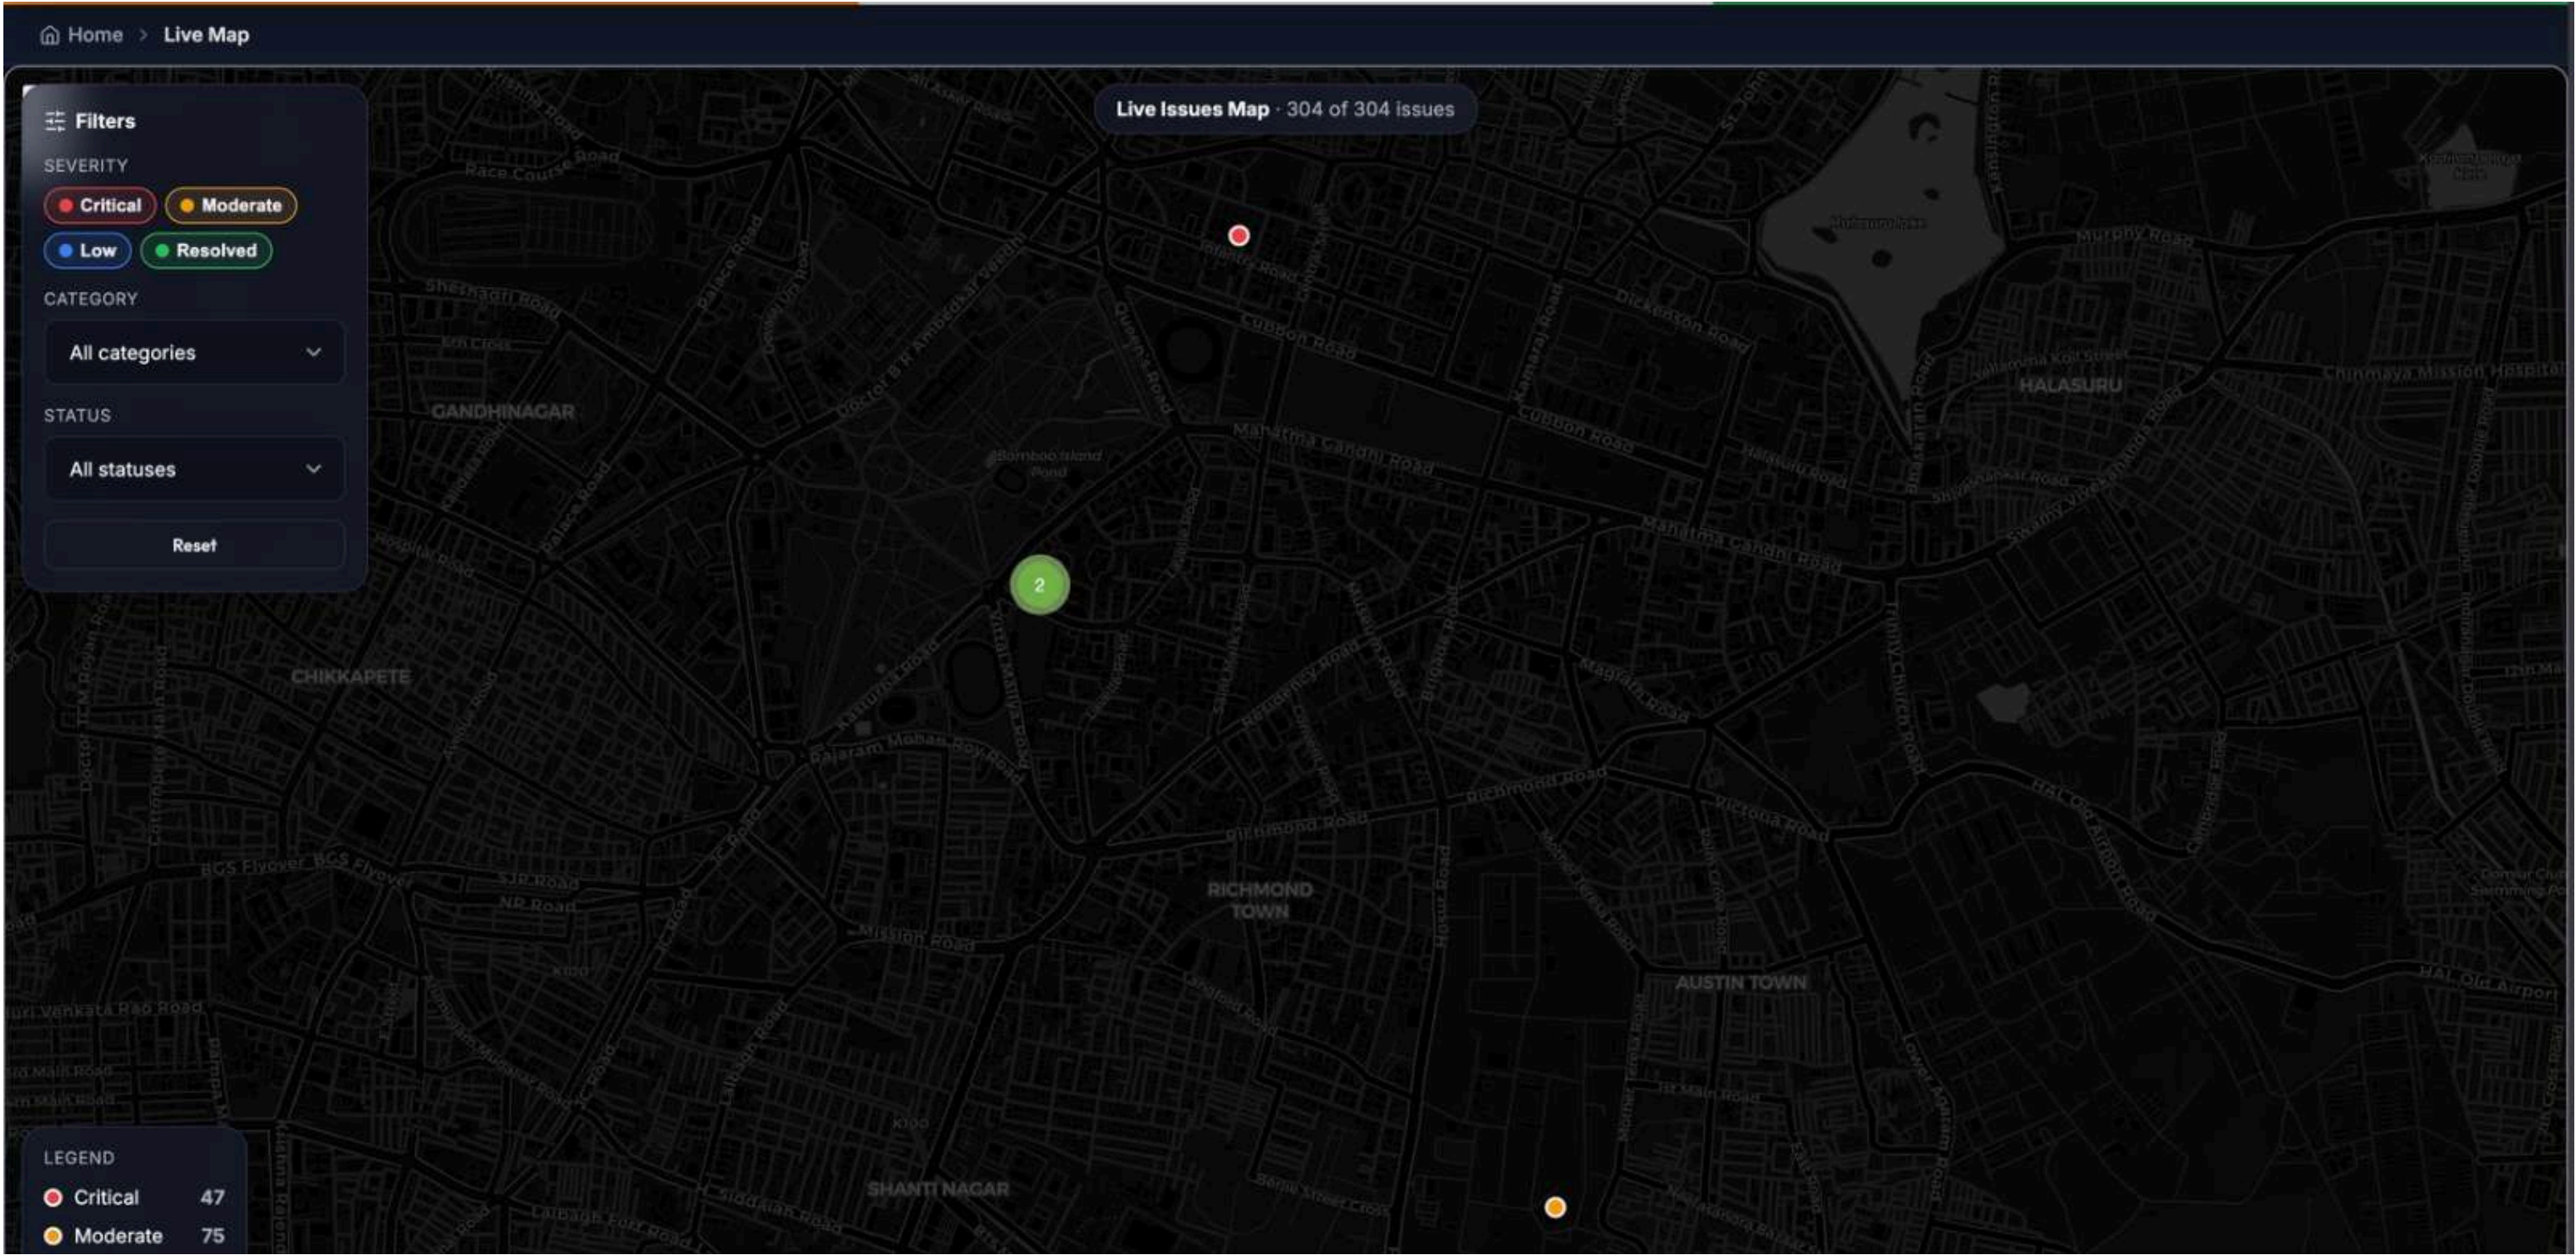

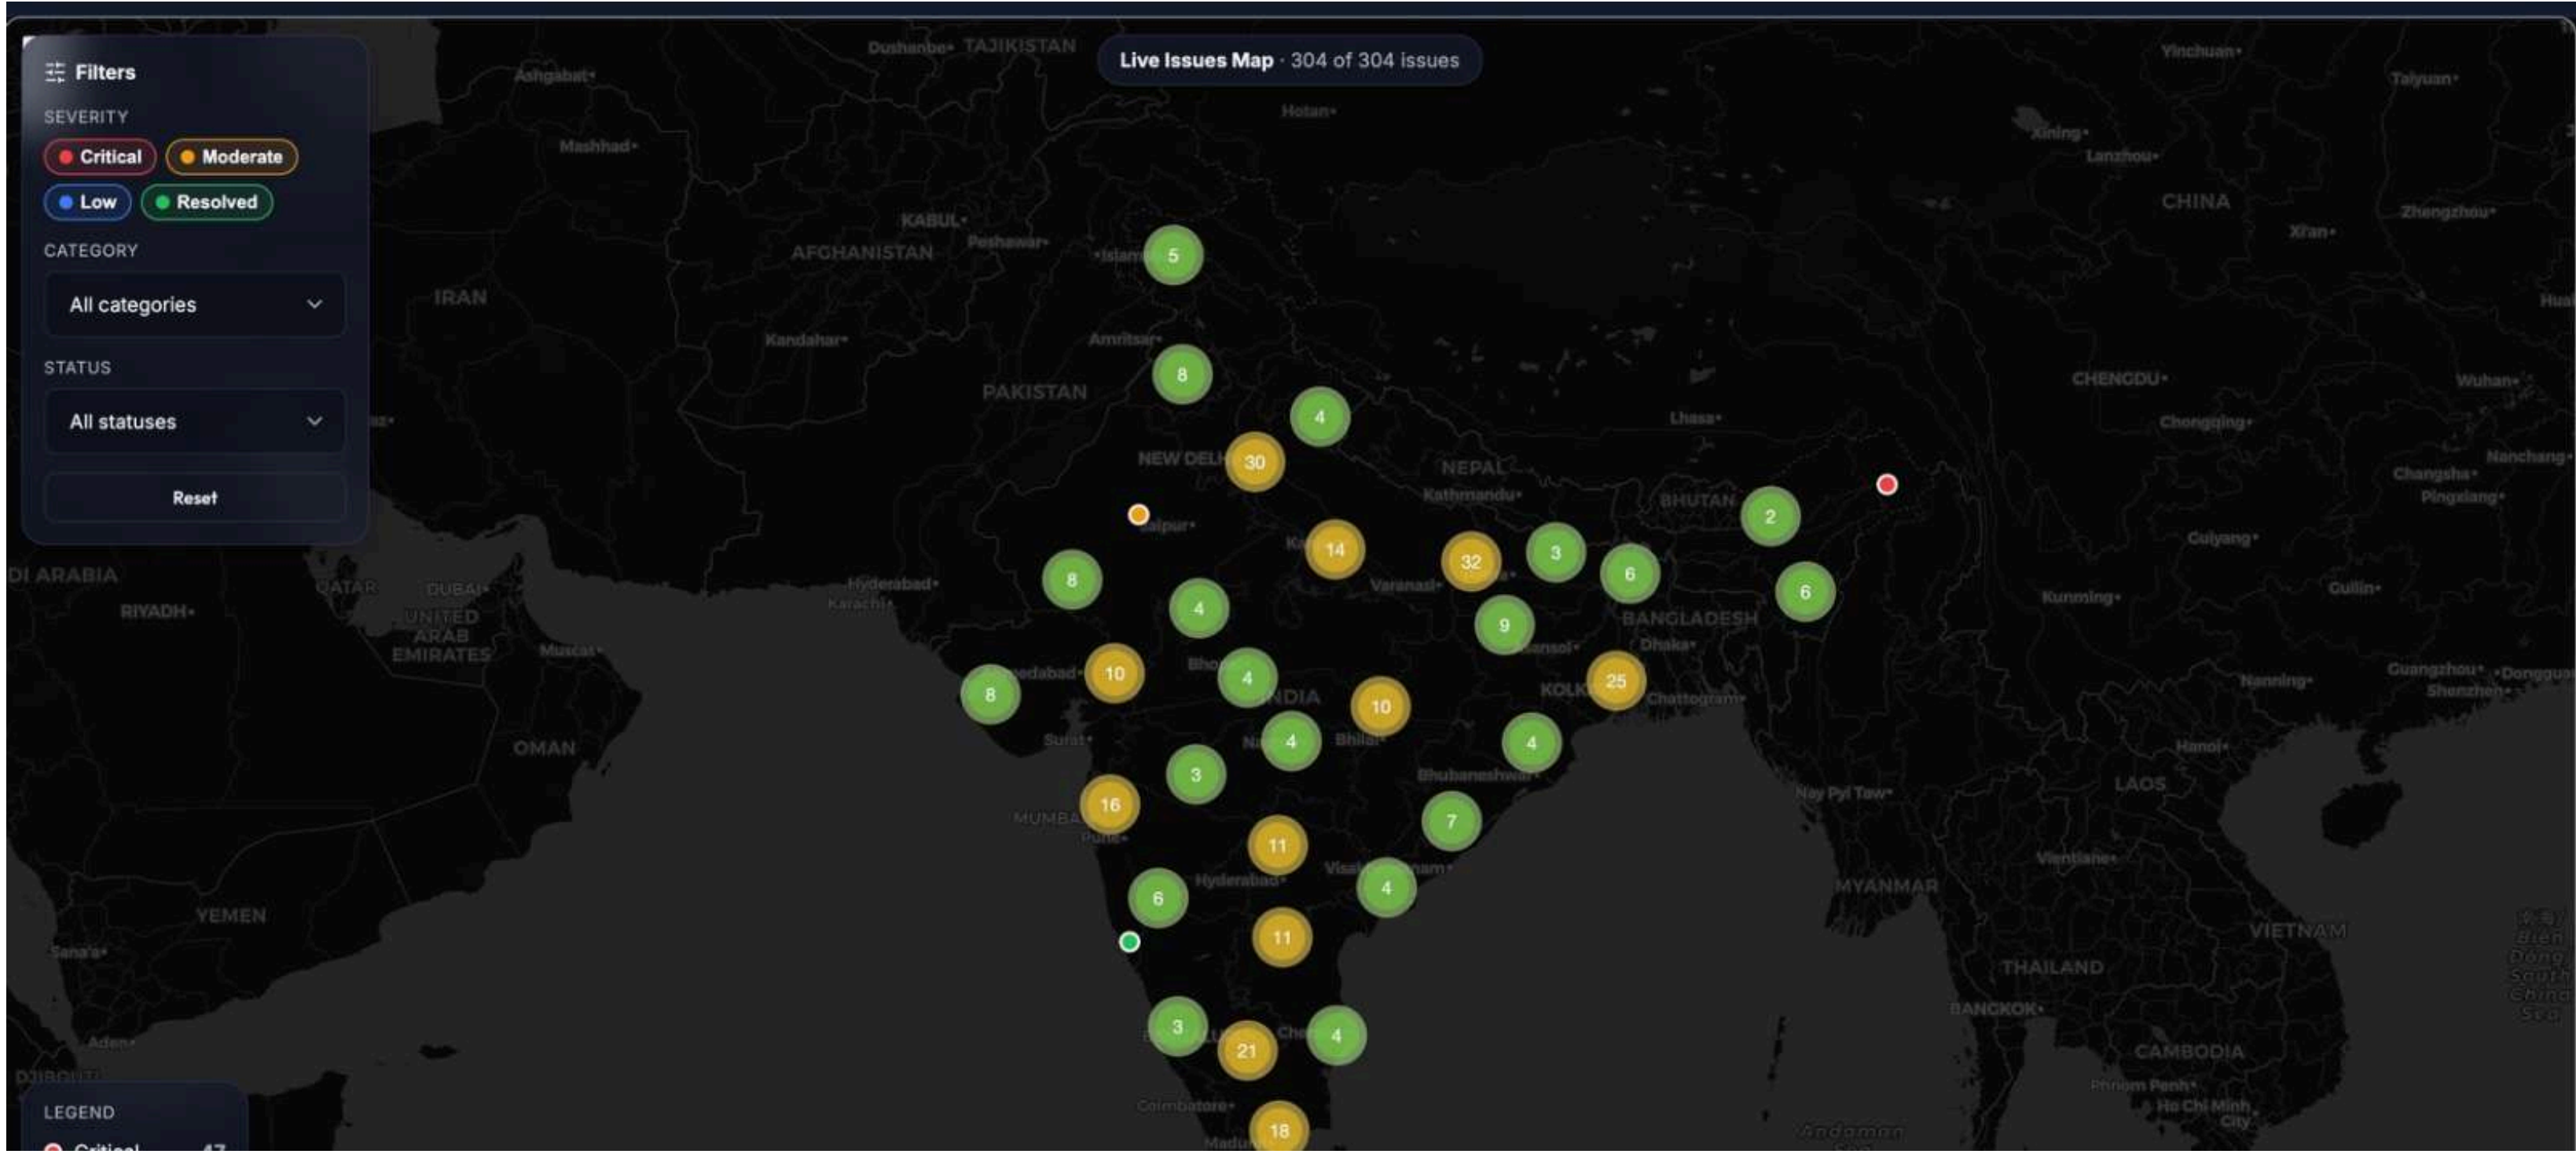

Transaction-Level Cleanup

Orphaned uploads are automatically wiped to secure disk space if a process fails.

What this means for an MP:

1. 100% Crash Protection: If 10,000 citizens send messages at the exact same moment during a monsoon, the system won't crash or lose a single report.

2. Absolute Safety: Standard secure folders guarantee citizen phone numbers and pictures are never shared with malicious online sources.

Hotspot Tracker Map

Glowing circular markers highlight regions with the highest density of unresolved citizen grievances.

| Eliminating Admin Latency

Direct BigQuery Federated Queries vs Traditional Setup

By using Google Cloud BigQuery external queries, we read databases directly in-place. This completely eliminates manual scheduling scripts and background datalake latency.

Civic Pulse Real-Time
Connection

Instant Access (1 Second Latency)

Traditional Standard Syncs

Standard Batch Syncs (12 to 24 Hours
Lag)

- ✓ **Faster public service awareness: PMO executives monitor issues instantly as citizens send them, rather than waiting for next day reports.**

Who It Serves

Elected Leaders

Constituency Oversight

Track road and health backlogs in real-time. Stand before voters with factual proof of your rapid local resolution speed.

Ward Officers

Clean Directed Tasks

Receive pre-formatted, mapped tasks directly to local work groups. Spend zero hours translating documents or answering phones.

PMO Admins

National Analytics

Detect macro civic bottlenecks, deploy targeted crisis funding, and rate local administrators objectively on resolution performance.

PMO Representative Roster

Dynamic Governance Directory & Performance Indices

REPRESENTATIVE POSITION	TARGET CONSTITUENCY	AVG. RESOLUTION SPEED (TAT)	ACTIVE BACKLOG	PERFORMANCE GRADE
Lok Sabha MP	Bengaluru Central Division	3.8 Hours	12 Open Tasks	Rank 1 (94/100)
Vidhan Sabha MLA	Shivajinagar Assembly	6.2 Hours	24 Open Tasks	Rank 2 (88/100)
Ward Officer	Vasanth Nagar (Ward 93)	11.5 Hours	8 Active Tasks	Rank 3 (82/100)

* Performance Indexes evaluate Governance Scores out of 100 based entirely on verified ticket resolution speed and final user closure confirmations.

Production-Grade Fail-Safes

90%

Lower Migration Overhead

Integrates securely on top of existing local government legacy databases without disrupting crucial downstream systems.

Automated Priority Calculations

How Gemini calculates urgency weights from 1 to 100 to sort critical breakdowns:

$$\text{PriorityScore} = \frac{(\text{CategoryWeight} \times 0.6) + (\text{SentimentIntensity} \times 0.4)}{\sqrt{\text{TimeElapsedHours} + 1}}$$

Fail-Safe Fallbacks:

Safe backups prevent messy server leaks and keep analytics 100% operational.

Scale Beyond the Pilot

Strategic Growth

Scaling the platform seamlessly across territories:

Municipal Scale Integration

Establish local ward officer networks (e.g. BBMP, BMC) to resolve public sanitation and roads.

National Assembly Integration

Connect MP and MLA scorecards with larger national dashboards without database lag.

AI Automated Duplicate Prevention

Combines overlapping regional alerts into single action vectors using vector searches.

Safety & Compliance

Enterprise protection built-in from day one:

Strict Role Access (RBAC)

Keeps operations secure between Citizens, MPs, and Admin panels.

Domestic Sovereignty Support

Deployable directly inside state government cloud systems to secure local citizen data.

Immutable Audit Logs

Secures historic logging of all assignments, changes, and response speeds.

Transform Civic Governance Today

Empower your constituency, track critical municipal work lines, and lead with transparent administrative metrics.

The Civic Pulse Initiative

Deployable on your local infrastructure in under 48 hours
with zero structural changes to legacy data.
